

GENERAL TRANSFER PUMPS

- § **Economic, Efficient & Reliable**
- § **Proven Seal/Less Design**
- § **Robust Construction**
- § **Stainless Steel Liquid End**
- § **Silicon Carbide Bearings**
- § **Pump Monitoring Option**
- § **Worldwide Support**

The HMD range of general transfer pumps deliver capacities up to 25 m³/hr and heads up to 40 metres at 50 Hz. The GT pumps are available in close coupled form and are fitted with single silicon carbide bearings, they are ideal for general transfer duties in the chemical, petrochemical and all process industries. The magnet drive seal/less design from HMD ensures zero leakage and with almost 30,000 pumps in service worldwide HMD has the proven pedigree of pumping performance.
